

## **Bravida providing energy efficient installation services for Kristianstad Prison on behalf of NCC, with an approximate order value of SEK 130 million**

**Bravida has been assigned the task by NCC of providing energy-efficient installation solutions relating to electrical systems, heating and plumbing, and HVAC for the new prison building in Kristianstad.**

The new prison being constructed for the Swedish Prison and Probation Service covers around 17,000 square metres and will provide around 100 new places for offenders. Bravida is part of the joint contractor and will perform energy efficient installations for electrical systems, heating and plumbing, and HVAC.

The building will be environmentally certified to the BREEAM level 'excellent' and comply with high environmental targets.

“We are very pleased to be part of the project together with NCC and to have the opportunity to contribute our skills and experience. The project has a strong focus on climate-smart solutions, which is in line with Bravida’s own sustainability efforts,” comments Johan Gustafsson, Regional Manager at Bravida Prenad.

The project started in spring 2022 and is scheduled to be completed by spring 2024. Around 30-40 employees from Bravida will perform the installation work.
