

## **Bravida Norway awarded contract by Skanska to perform electrical installations with an order value of more than NOK 110 million**

**Bravida Norway has signed a contract with Skanska to carry out all the electrical installation work for the new Helgerudkvartalet urban development project in Sandvika.**

Helgerudkvartalet is the first phase of Sandvika town centre's major urban development project, in which two brand new urban complexes will be built, with a total floor space of around 60,000 square metres. The project has a combination of commercial and residential space, with the aim of creating an attractive town centre that incorporates environmental aspects, quality and the existing architecture.

"The project has a strong focus on sustainable urban development, which is well in line with Bravida's own sustainability strategy, and we are very pleased to have been given this task. Our Drammen branch has a skilled and experienced project environment, featuring project managers and fitters with many years of experience in the field, so we can guarantee reliable and high-quality work," comments Øyvind Hagen, Head of Division for Eastern Norway at Bravida Norway.

The project will involve 10-20 people from Bravida and the company's branch in Drammen. The project started in autumn 2021 and is expected to be completed in 2024.
