

**Press release**  
**29 August 2018**

## **Bravida has been awarded considerable contract for the Stockholm Bypass Project**

**On August 28<sup>th</sup>, the Swedish Transport Administration commissioned Bravida to perform all installations in electrics, lighting, water and waste, and fire extinguishing systems within the Stockholm Bypass Project. The contracts have an order value of just over SEK 2.7 billion. The decision of the Swedish Transport Administration can be appealed within 10 days.**

The Swedish Transport Administration has awarded Bravida two contracts within the Stockholm Bypass Project. Bravida will perform all installations in electrics, lighting, water and waste, and fire extinguishing systems on the entire stretch of road. The contracts have a total order value of just over SEK 2.7 billion.

– We are very pleased to have been awarded these contracts by the Swedish Transport Administration. Bravida has extensive experience from large and complex infrastructure projects, for example from the Stockholm Northern and Southern Link tunnels and the Stavanger tunnels in Norway. This experience will be a strength when we take on this important mission, which will link and simplify the traffic through Stockholm, says Mattias Johansson, CEO and Group President, Bravida.

The project will start with a design phase of one to two years, followed by a production phase of just over three years. Bravida will also be responsible for service and maintenance of all installations until 2026.

Bravida and the Swedish Transport Administration will not be able to sign the contracts until after an appeal period of ten days.
