Bravida and Purac in strategic cooperation for the Stockholm Bypass Project

Bravida is planning and preparing for the contracts within the Stockholm Bypass Project. As part of that, Bravida has signed a subcontracting agreement with Purac AB. The agreement covers collaboration on solutions for water and wastewater facilities in the Stockholm Bypass.

Purac AB specializes in solutions for water and wastewater treatment, and has solid experience from previous projects within infrastructure. Bravida has a long relationship with Purac from several joint projects.

“I look forward to working with Purac. They have a high level of expertise and are a reliable supplier. We have complemented each other well when we worked together in, for example, the Northern and Southern links in Stockholm. I am convinced that we will do so also in the project for Stockholm Bypass.” Said Mika Sundholm, Project Manager at Bravida.

Purac is a global provider of water and wastewater solutions for municipalities, industries and infrastructure. Owe Sänneskog, Sales Manager at Purac said:

“I am happy that Purac will once again have the opportunity to cooperate with Bravida in a large infrastructure project. Purac will supply all water and water systems to the Stockholm Bypass. Our experience from tunnels and similar projects is that it is crucial to plan carefully and in good time. We will begin this work immediately.”

The agreement is valid from 8 March 2019 and Purac will participate in the projects from the design phase and throughout the production phase.
