

Bravida Sweden installs for 70 million in collaboration project at new hotel in Gothenburg

The Gothenburg amusement park Liseberg is building a new hotel in connection with its 100th anniversary in 2023. The project is a collaboration project with NCC as the main contractor. Bravida has been commissioned to carry out design, electricity and telecommunications installations in the project, at an order value of SEK 70 million.

Gothenburg's big amusement park Liseberg celebrates 100 years in 2023 and is building a new hotel for the anniversary – Liseberg Grand Curiosa Hotel. It will be an imaginative family hotel with children's exploration in the center. Bravida is part of the collaboration contract and will be responsible for design, electricity and telecommunications installations in the project.

– Bravida is a major market player with a local history, which is a security for both us and the customer. We have a good understanding of each other's work processes as well as openness and transparency – which is important in a project like this. Therefore, after a well-functioning collaboration in Phase 1, it became natural to continue our collaboration also in Phase 2, says Andreas Widegren, Purchasing Manager at NCC.

The theme of the facility is inspired by the history of Gothenburg and the East India Company. In the project, an important part for Bravida will be to adapt all the installations to the theme.

– A close dialogue will be crucial in the collaboration with our client. This is an important project and Bravida has been selected based on expertise and organization. We are very proud of the assignment, says Tomas Thiel, branch manager, Bravida Gothenburg.

The order value is estimated at SEK 70 million and the project is expected to employ an average of 20-25 Bravida employees. The design phase has started and the project is expected to be completed in the first quarter of 2023.
