

Bravida wins large service contract on the Great Belt Fixed Link

Sund & Bælt A/S has once again given the trust to Bravida as responsible for the operation and maintenance of all mechanical and electrical systems on the Great Belt Fixed Link in Denmark. The frame agreement runs over four years with the possibility of further extension for up to four more years.

Bravida Denmark won the tender once again, in competition with three other companies. In addition to operation and maintenance of all mechanical and electrical systems on the Great Belt Bridge, the frame agreement has been extended to also include maintenance of the Öresund Bridge's land facility on the Danish side.

Bravida already has four and a half years of experience in operation and maintenance of the Great Belt Bridge and previously also maintenance of the Öresund Bridge's land facility.

- The agreement means a lot to us and we are proud that we have once again been given the trust. We have a competent organization with a lot of experience and we are ready to continue our important work to ensure that the installations on one of Denmark's most important traffic routes work, says Johnny Hey, head of division Bravida Denmark.

The agreement applies from 1 November, 2020.
