

Bravida awarded installation contract worth SEK 61 million for swimming centre in Jönköping Municipality

Bravida has signed a contract with Jönköping Municipality for the installation of an air treatment system at the new Rosenlundsbadet swimming centre in Jönköping.

Swimming pools are among the most demanding environments for which local authorities are responsible. The new Rosenlundsbadet swimming centre is being built with a focus on efficient operation and lower maintenance costs, and will welcome half a million visitors each year.

“Bravida’s expertise in air treatment systems for swimming pools will ensure a safe indoor environment and reliable operation; this will reduce wear and tear on the building and contribute to more cost-efficient management. We know this is crucial for municipalities,” says Lars Täuber, Head of Division Sweden at Bravida.

Rosenlundsbadet is a major development comprising 50-metre and 25-metre pools, a diving pool, several teaching pools and a family pool for younger children.

The assignment will start in September 2026 and is scheduled for completion in September 2029.
