

Bravida awarded SEK 650 million installation contract in Borlänge by EcoDataCenter

Bravida has signed a contract with EcoDataCenter for the installation of electricity and industrial piping at another data centre in Kvarnsveden, Borlänge. It will be the eighth EcoDataCenter data centre for which Bravida has performed installation work.

The assignment includes installing the electricity supply, power, lighting and cooling systems. Bravida has installation projects for eight EcoDataCenter data centres in Borlänge and Falun, four of which have already been completed.

“I am very proud of the longstanding collaboration we have with EcoDataCenter and that we have now been awarded another contract. Bravida possesses unique expertise in large projects and we are the leading partner for data centre projects. We are now also welcoming additional specialists to the assignment,” says Lars Täuber, Head of Division, Bravida Sweden.

The projects contribute to new jobs in the region, where EcoDataCenter and Bravida are collaborating with the aim of recruiting around 150 people to the site in Kvarnsveden during the autumn. Construction engineers, project managers, electricians and industrial piping fitters are needed.

“Our investments in Borlänge are a key element in meeting the needs of the entire society regarding increased digitalisation. Bravida's ability to deliver projects of this size is important for us, and we have been building data centres together in the Dalarna region since 2019,” says Peter Michelson, CEO of EcoDataCenter.

The order has been registered in the third quarter of 2026. The assignment in Kvarnsveden will start immediately and is scheduled for completion in the first quarter of 2028.
