

Bravida signs a multi-year service agreement with Alstom for technical Facility Management services

Bravida has signed a three-year agreement to provide technical FM services to Alstom. Bravida's deliverables include technical service for offices, depots and production sites throughout Sweden.

Bravida will provide Alstom with technical FM services such as inspections, technical care, corrective maintenance and readiness regarding technical installations. Alstom is the largest operator in the Swedish railway market, having delivered over 1,000 trains. Alstom is also a leader in signalling systems, and is supplying the new national traffic management system to the Swedish Transport Administration.

“We are very happy to have been entrusted with the provision of technical FM services to Alstom in Sweden. Bravida is positioning itself as a clear provider of technical FM services and it feels very good that more and more customers are realising the benefits of splitting up their FM provision,” comments Pontus Monthan, Head of TFM at Bravida.

Bravida is active in all locations where Alstom operates.

“When we at Alstom decided to divide up the FM package into three parts, Bravida was the main candidate for the technical delivery linked to previous work carried out at Alstom in Västerås. We are looking forward to starting this direct relationship with Bravida and aim to ensure an efficient cooperation that can be developed further,” comments Jacob Hultin, Facility Manager at Alstom.

The assignment started on 1 March 2023 and will run for three years.
