

## **Bravida commits to Science Based Targets initiative**

**Bravida has committed to set near- and long-term company-wide emission reductions in line with science-based net-zero with the SBTi. Bravida has been committed since March 2023.**

“It feels important that we, as the Nordic region’s leading service and installation company, show that we are serious about taking responsibility and reducing our climate impact. Committing to setting science-based targets is an important step forward for us in our sustainability efforts,” comments Åsa Neving, CFO of Bravida.

The Science Based Targets initiative (SBTi) is a global organisation that makes it possible for companies to set ambitious emission reduction targets in line with the latest climate science and the Paris Agreement’s goal of limiting global warming to 1.5°C. The initiative is a collaboration between CDP, the World Resources Institute (WRI), the World Wildlife Fund (WWF) and the UN Global Compact.

More information about Science Based Targets is available [here](#).
